PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate skilled in Python, SQL, and Data Structures & Algorithms with hands-on experience in software development, machine learning, and web applications. Built and deployed projects including a Student Management System and AI-based academic performance prediction platform. Strong problem-solving abilities with practical experience in backend development, databases, and responsive web technologies. Passionate about Software Engineering, AI, and scalable real-world solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Web Development: HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Render

Cloud & AI: AWS Fundamentals, Data Analytics, Machine Learning Basics

INTERNSHIP EXPERIENCE

Software Engineer Trainee – HackerRank | Remote - *June 2025 – September 2025*

- Solved Data Structures and Algorithms problems focusing on arrays, strings, and basic improvement problem-solving efficiency
- Implemented core algorithms such as sorting and searching to strengthen logical and analytical thinking
- Consistently practiced python language and with better codes, enhancing time complexity optimization and prompting skills

Web Development Intern – Rooman Technologies | Remote - *March 2025 – July 2025*

- Designed and developed responsive web pages using HTML, CSS, and JavaScript, ensuring cross-browser compatibility
- Assisted in building and integrating frontend components with improved User-Interface structure

PROJECT EXPERIENCE

Student Academic Performance Predictor | Python · Pandas · Machine Learning · Streamlit

- Developed a machine learning application to predict student academic performance using behavioural and academic datasets
- Performed data preprocessing, feature engineering, and model optimization to improve prediction accuracy
- Built an interactive Streamlit web interface for real-time prediction and visualization and improved Team Collaboration
- Applied data analysis and ML workflows including model training, evaluation, and deployment

Student Management System | Flask · SQLAlchemy · Render

- Built a full-stack web application to manage student records, GPA tracking, and authentication with secure backend integration
- Designed and implemented database models using SQLAlchemy and deployed the application on Render with Efficiency
- Demonstrated end-to-end development lifecycle including backend logic, database handling, and production deployment

Personal Portfolio Website | Frontend Technologies · Github Pages

- Designed and developed a responsive personal portfolio to showcase projects, technical skills, and certifications with clean UI
- Deployed the website using GitHub Pages, ensuring accessibility and consistent performance across devices
- Utilized as a professional profile to present work effectively to recruiters and enhance online presence

EDUCATION SUMMARY

Bachelor of Technology in Computer Science & Engineering, G. Pullaiah College of Engineering and Technology

Building strong foundations in programming and core computer science.

Expected : July 2026 | CGPA: 8.5/10.0

Intermediate (PCM), Narayana Junior College, Kurnool, India

Developed strong analytical and problem-solving skills through mathematics and science. *Completed: July 2022 | CGPA: 9.1/10.0*

Secondary School Certificate (SSC), Montessori E.M. High School, Kurnool, India

Achieved excellent academic performance with consistent focus on discipline.

Completed: Mar 2020 | CGPA: 9.8/10.0
